(54) Title: SAFETY LINE ANCHOR

(57) Abstract: A bottom anchor assembly for a substantially vertically-orientated elongate safety line comprises safety line gripping means, tensioning mean for adjusting the safety line tension to a predetermined value, bracket means and connector arm means. The tensioning means and safety line gripping means are spaced apart and are linked by the connector arm means so that a safety line traveller moving along a safety line gripped by the safety line gripping means can pass over the safety line gripping means and the connector arm means.
